

Long Bay Buildings

Good Iron. GREAT Experience!™

Behlen Long Bay Building System

Behlen craftsmen use sophisticated state of the art equipment, combined with an empowering attitude, to deliver the quality our customers demand. We truly are the Good Iron People and have established a reputation in the industry of providing buildings that go together efficiently. The Long Bay Building System is an example of how choosing a steel building from Behlen, can save building owners time and money.

Economical

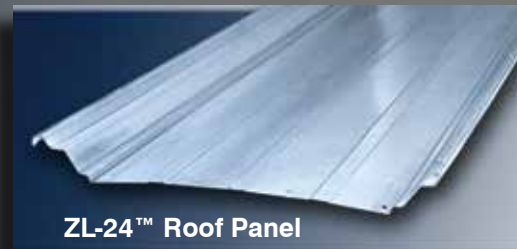

Provides bay lengths over 60 feet maintaining the efficiency of building with metal.

Versatile

Can be combined with hardwall systems (masonry, pre-cast, and tilt-up construction) as well as metal wall panels. Can also be utilized with a variety of roof systems including B-deck and built up roof systems, making it competitive with conventional construction methods.

Durable

Joist purlins are designed and manufactured according to the Steel Joist Institute (SJI) specifications.

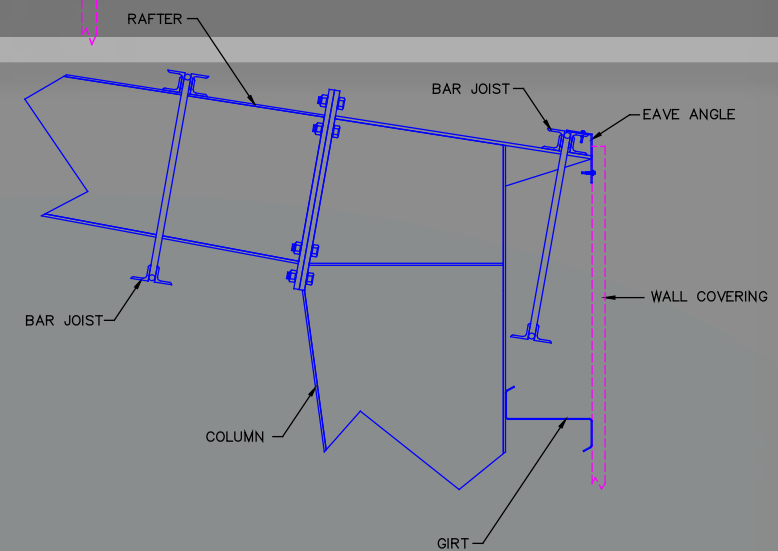

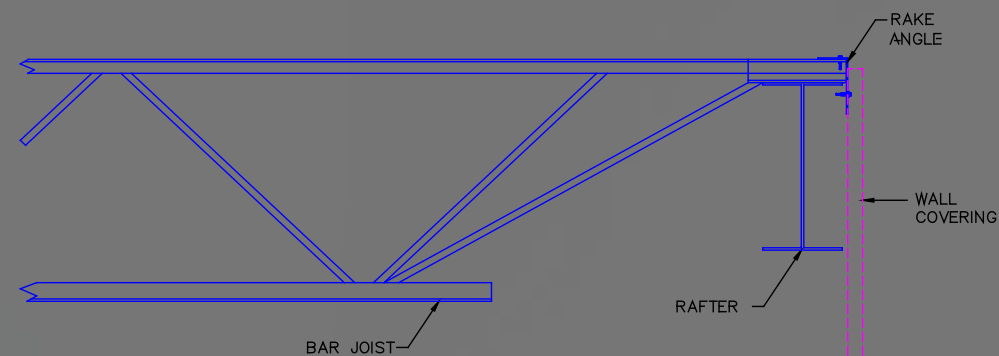

ZL-24™ Roof Panel

Efficient

A perfect match for Behlen Building Systems' ZL-24™ Standing Seam Roof System.

System can be provided through one source, ensuring all components are compatible and fit up right.

Usable

Larger bay spacing can minimize interior columns, providing more usable space for building owners.

Straightforward

Familiarity of steel erection crews with standard bolt and nut construction practices can be utilized. This helps minimize total steel erection cost savings for building owners.

Sustainable

The joist purlins of a Long Bay Building System are made with recycled material. All Behlen Building Systems steel products are 100% recyclable, providing an opportunity to receive additional LEED points (Leadership in Energy and Environmental Design).
