

S-Span Buildings

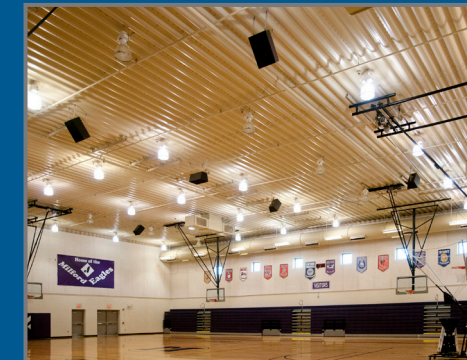

Good Iron. GREAT Experience!™

The Behlen name is renowned for providing quality building systems made by craftsmen with a heritage dating back over 80 years. We are “The GOOD IRON People” and it shows in every building – every time.

Behlen has maintained ISO 9001 Certification since 1999 and is the first metal building manufacturer in the United States to achieve International Accreditation Service (IAS) AC472 Accreditation. IAS AC472 accreditation provides assurance a metal building manufacturer has been thoroughly scrutinized by independent non-biased third party auditors and fulfill the special inspection requirements of the IBC.

Unique Design

Since the 1950's the Behlen S-Span design has proven itself perfectly suited for hangars, arenas, exposition centers, and other building applications requiring large, clear spans. S-Span buildings offer an economical approach to construction and concrete footing design.

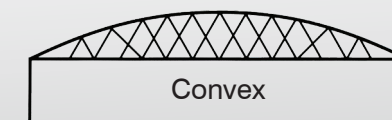

Wide Open Spaces

Construction of a Behlen S-Span building is truly unique. With all of the support strength formed into the corrugated steel wall panels, there are no interior frames to work around. S-Span interiors are open and attractive. Speakers, lighting and other equipment can be bolted directly to the ceiling. Mechanical equipment and electrical wiring can be concealed between the roof and the ceiling. The energy-efficient design of the roof allows for high R-values to be achieved.

Versatility

There is almost no limitation in facing materials that can be used on an S-Span building. Choose from standard corrugated steel panels, color coated ADP panels and facades to masonry, wood or even glass. The S-Span system is very versatile.

S-Span Buildings Stand the Test of Time.

Beck's Superior Hybrids is located in Atlanta, Indiana who has been a loyal Behlen customer since the 1970's. The largest family-owned, retail seed company in the United States is led by Sonny Beck. The company started on an 80 acre farm which is now their headquarters as seen above showcasing the Behlen S-Span product. Beck's capitalizes on the versatility of our S-Span product utilizing wide open spaces for offices, warehousing, storage and more.

Beck's philosophy emphasizes quality, service, and the importance of agronomic research to

the future wellbeing of the American farmer. Beck's serves farmers in Indiana, Illinois, Ohio, Michigan, Kentucky, Tennessee, Iowa, Wisconsin, Minnesota, South Dakota and Missouri.

Behlen values long term relationships such as this. With a shared culture of building relationships with integrity and honesty, Behlen looks forward to a continued partnership and many years of success.
