EXPERIENCE

The Behlen name is renowned in Rural America for providing quality steel building systems, made by craftsmen, with a heritage dating back more than 80 years. We are “The GOOD IRON People” and it shows in every building – every time. Behlen buildings have met the needs of farmers, ranchers, grain storage facilities, and ag businesses by standing up to the elements and serving as an essential part of their operations from one generation to the next.

VALUE

A Behlen building maintains its value, integrity and strength. All steel construction provides greater stability than a wood frame structure. Behlen buildings are built to last.

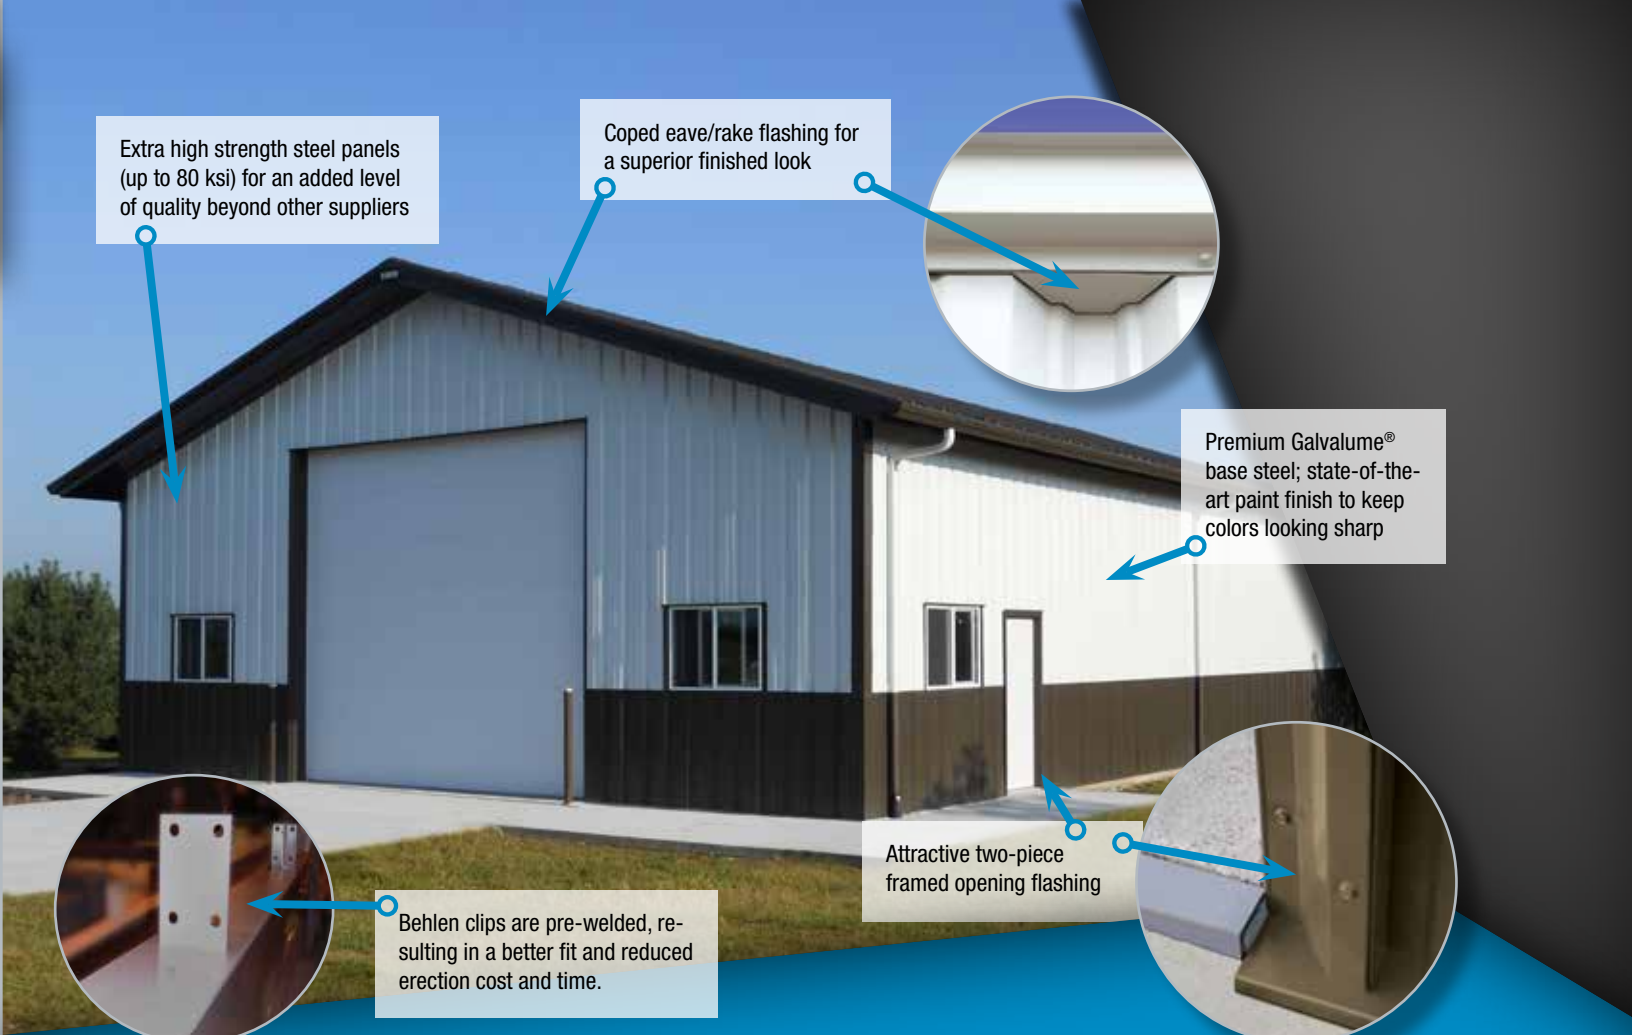

QUALITY

Behlen has maintained ISO 9001 Certification since 1999 and is the first metal building manufacturer in the United States to achieve International Accreditation Service (IAS) AC472 Accreditation. IAS AC472 Accreditation assures a metal building manufacturer and its staff have a world class quality system in place and have been thoroughly scrutinized by independent non-biased and objective third party auditors.

FLEXIBILITY

A Behlen building can be configured into a nearly limitless combination of widths, lengths, and heights. Your building is an important investment and we provide it to your exact specifications.

Extra high strength steel panels (up to 80 ksi) for an added level of quality beyond other suppliers

Coped eave/rake flashing for a superior finished look

Premium Galvalume® base steel; state-of-the-art paint finish to keep colors looking sharp

Behlen clips are pre-welded, resulting in a better fit and reduced erection cost and time.

Attractive two-piece framed opening flashing

Precision manufacturing resulting in steel that fits up right!

Industrial-grade, aesthetically pleasing gray primer in accordance with SSPC specifications

Optional liner panel provides added protection and a clean, finished look

Flexibility in design allows for customized structural features such as large door openings

DESIGN BUILD

Authorized Behlen Builders must be experienced and held in high regard by the construction industry to meet your expectations. Your Authorized Behlen Builder will partner with you to develop a sound, well-defined budget and get the greatest return for your investment. You can handle the day-to-day needs of your operation rather than deal with construction details. Authorized Behlen Builders are independent contractors and do not act as agents of Behlen Building Systems.

FUTURE GROWTH

Behlen buildings can be easily designed for fast, economical additions and other enhancements.

ENERGY SAVINGS

Behlen buildings can easily incorporate energy efficient insulation systems for long-term HVAC economical performance. Plus, our durable components and quality construction minimize maintenance requirements.

Mastic between all panel joints and foam sealer at the base provide a protective barrier against moisture and wind. All panels are fastened together with large 3/8" dia. bolts that will not work loose with heat, cold or vibration. Panel connections, footings, and sealers are designed for tight fit and long life. All panels are fastened together with plated 3/8" diameter bolts.

| DIMENSIONS | | |
|------------|--------|------------------------------|
| Width | Height | Height 3' from Sidewall Base |
| 51' | 17'-5" | 4'-11" |
| 60' | 20'-0" | 4'-11" |
| 68' | 23'-0" | 5'-2" |

CURVET BUILDINGS

The Behlen Curvet™ is for anyone looking for an economical approach to store equipment or grain in a building with superior strength and the ability to stand strong against the elements. The building's rugged S-Span™ design is clean, open, and free of interior columns. The Behlen Curvet™ has proven itself as a vital building across the country.

FEATURES

- Made from durable 18 gauge steel, providing outstanding strength
- Grain storage Curvets™ allow grain to be filled to 10' high against sidewalls and 9' high against endwalls, without tie rods or braces
- Loading hatches can be located along the top of the building to make filling a simple operation
- Can be easily expanded for additional storage
- Standard bottom rolling slide doors open with ease and operate on large diameter wheels
- All slide doors have 3" roll formed panels

AVAILABLE DOOR SIZES

- 16'-10" wide x 14' tall
 - 23'-8" wide x 14' tall
 - Larger sizes available*
- *16' tall doors are available on 60' and 68' wide Curvets™ only
- *Larger 44' wide x 14' tall and 30'-6" wide x 16' tall slide doors are available for the 68' Curvet™ only

RURAL AMERICA

The roots of Behlen Mfg. Co. in Rural America go deep, really deep. Behlen has been manufacturing quality products in Rural America for Rural America more than 80 years.

Along with Behlen Building Systems we are proud to offer our Behlen Country Farm and Ranch Equipment and Behlen Grain Systems.

Behlen Country is a leading manufacturer of farm and ranch equipment. Our products are designed and tested for “real world” use, whether you are a weekend enthusiast or professional rancher when you use Behlen Country products “Possibilities are Endless.”

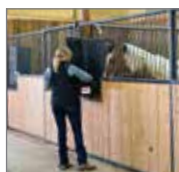

Behlen Grain Systems has earned a solid reputation for quality grain storage systems throughout the world. We know you work diligently to get every bushel from every acre so we work just as hard to provide you with the storage solutions you need. From our temporary curvet crop rings to our million bushel bins “Behlen is Engineered to a Higher Standard.”
